

11-22

When I see these two numbers side by side, indisputably inseparable for me, inseparable for a multitude of reasons, including musical ones, I sometimes feel like saying: "11-22, THAT SAYS IT ALL!"

Obviously, it doesn't say "ALL" strictly speaking. But, on many levels, it reveals so much about several new human perspectives, including that of **the history of Western Civilization over the past century**. In other words, "11-22" explains a certain state of the world today from a new perspective.

"11", as in "the eleventh hour"

The eleventh hour refers to an ancient method of calculating hours that began with sunrise and divided the day into twelve parts: the eleventh hour is therefore the last before sunset and therefore the end of the working day.

Writing

To date, I have written three books, all unpublished, on "Vibration Number 11," not the number "11" itself.

In 1999 - The Eleventh Vibration Heard (L.O.V.E.) Subtitle - Once Upon a Time in Harmony

In 2001 - "11" - The Second Threshold (begun 4 months before the 2 Towers) Subtitle - Human Harmony

In 2015 - Heading upwards
Subtitle - "V11," The Apocalyptic Vibration.

It is often said that "Art is a reflection of the society in which it manifests itself." Regarding music, my rather unique background allows me to affirm this to be the case.
